

HOBBYECTS

for the emancipated consumer

HOBBYECTS™

for the emancipated consumer

What is HOBBYECTS™ ?

They are new objects made from other new objects, decontextualizing their origin and recontextualizing their finality.

Their aim is to stimulate the sensory reactors by confrontation of patterns.

The later output would be the development of a sense of emancipation from consumption and the fulfillment of doing it yourself.

HOBBYECTS™ has four branches:

made by us: unique numbered objects made from new parts.
They can be ordered on this site.

made by them: showroom with objects from other designers who share our upcycling and open source approach.

made by you: The power in your hands, with know-how on low-tech.
You can participate in Workshops whose dates you will find here or invite us to your space.
You can also get to know our research texts.

made for you: architecture and design services, where we produce customized projects for your needs, with endogenous material and human resources.

HOBBY
from *hobby horse* (14th cent.)
a little horse
possibly from the name of a particular horse

OBJECT
from the Latin *obiectum*
thrown against
ob: against
iacio: to throw

EMANCIPATE
from the Latin *emanciperen*
to let go of the hand
to transfer
e: from
man: hand
cip: take

CONSUME
from the Latin *consumo*
to take fully
con: intensivity prefix
sūmō: to obtain

made by us

CORKIT™

CORKSCREW
spiked clamp ø 40mm, M6 nuts

CKI numbered series

CORKIT™ is a corkscrew made from a spiked clamp and two nuts.

CORKIT™ means time.

Due to the reduced spacing of its thread, it takes three times longer to insert.

Meanwhile, the sommelier has time to develop his choreography, to introduce the characteristics of the wine and to inform about the **CORKIT™** he is using.

The spigot must be inserted in its entirety, without urgency, and also the cork must be extracted with care.

PLAIN[™]

WATER MIXER

4 elbows, 2 stopcocks, 1 Tpipe, washers, linen waste

PL1 numbered series

PL2 numbered series

PLAIN[™] is the faucet that never existed in our grandparents' yard. Made with conventional half-inch pipe parts, these join together in the contemporary form of a hot and cold water mixing tap.

OTTO[™]

WIRE CLAMP

electrical connector \varnothing 4 mm

OTT numbered series

OTTO[™] is the perfect wire clamp: simple and safe. Made of a stripped electrical connector, it contains no more nor less than what a wire clamp needs.

LAMPA^{II}

CEILING LAMP
vegetables drainer, socket

LAM numbered series

LAMPA^{II} is a ceiling lamp made from a vegetables drainer.
Its wings are suitable to regulate the desired height.
The roses drawn by its drill are projected like stars in the illuminated ceiling.

GIZ^{II}

DOOR STOP
blackboard eraser, screw

GIZ numbered series

GIZ^{II} is a door stop that reuses an essential part of the memory of those who went to school in the last century.
The blackboard's chalk eraser is out of use but its clear, analogue function makes it suitable for other purposes.

MILA[®]

HANGER
clothespin

MIL numbered series

Not just drying clothes deserve to be hung by such an influential design object.
MILA[®] is a clothespin that serves to hang drawings, kitchen cloths or just reminders.

BOL IN BOL[™]

PASSE-PARTOUT
jar, planet softball

BOL numbered series

BOL IN BOL[™] is a pass-partout with balls inside of bowls.
The pressure exerted against the walls adjusts the photographs and gives them three-dimensionality.

MARCEL™

COAT HANGER
metallic coat hanger

Replica of *Profile of Marcel Duchamp in a Coat Hanger*, 1983, by Ai Weiwei

MAR numbered series

Marcel Duchamp built a fountain by inverting a urinal.
Ai Weiwei, with a coat hanger made a profile of Duchamp.
Today, this inversion has become the status.
What turns incongruous again is putting the urinal in place.
MARCEL™ is a coat hanger from ... a coat hanger.

KEYSH™

JEWELRY
steel pipe, computer key

KEY numbered series

KEYSH™ are jewelry made from keys of computers, cash registers and calculators.
From rings to cufflinks, they rediscover in obsolete technology a new brilliance.

LIGO^H

KEY CHAIN

Lego 8x8, Lego 4x2, metal ring

LIG numbered series

LIGO^H is a wall key chain to hang pocket key chains, made from Lego pieces. Its varied colors differentiate each key. The disparity of Lego attached to a wall prevents the key from being forgotten at home.

MAGGIE^H

MAGNIFYING GLASS

mineral water, bottle, cork

MAG numbered series

MAGGIE^H uses the optical effects of water and concave glass to create a magnifying glass. Made from mineral water and a bottle capped with a cork, it replaces any lens.

SILVER^H

TWO NOTEBOOKS
A4 notebook

SIL numbered series

Designed from the silver rectangle, the A-format papers have the characteristic that they can be infinitely cut in half or duplicated and maintain the same aspect ratio.
SILVER^H are two notebooks (one sketchbook, one pocketbook) inscribed in an A4 notebook.

LAVA^H

WASHBOARD
paint tray, blue and white soap

LAV numbered series

The current houses do not have a laundry tub.
On the other hand, there are clothes that should not wait for the time of washing them in the machine.
LAVA^H is a washing board particularly suitable for small parts such as briefs and socks.

A.QUA^H

TWO NOTEBOOKS
A4 blue notebook

AQA numbered series

A.QUA from water, *quaderni* or A-four.
Designed from the silver proportion, the A-format papers have the characteristic that they can be infinitely cut in half or duplicated and maintain the same aspect ratio.
A.QUA^H are two notebooks (one sketchbook, one pocketbook) inscribed in an A4 blue notebook.

DRAINO^H

DRONE
4 taps, 2 Tpipes, 1 cross junction, 2 washers, linen waste

DRO numbered series

DRAINO^H is the allegory of the drone.
A contemporary, heavyweight, decorative toy that flies in the imagination.
